Experience

Unity / C# Projects

Multiplayer Programmer, Unity / C# - *First Person Shooter*

February 2026 - April 2026

- Built 4 player session and connection system using Netcode for GameObjects, Lobby, and Relay
- Implemented hit detection, targeting, and AI enemy combat
- Collaborated with one other programmer using GitHub for source control

Gameplay Programmer, Unity / C# - *First Person Shooter*

December 2024

- Implemented player movement and GameManager tools
- Built team-based AI targeting logic
- Collaborated in a team of 5 using GitHub for source control

Audio Programmer and Team Bug Support, Unity / C# - *Top Down Rogue Shooter*

January 2024

- Built a 3D audio system with unique clips per action
- Identified, tracked (Jira), and fixed critical defects across the codebase

Unreal Engine / C++ Projects

Gameplay/Multiplayer Programmer, Unreal Engine / C++ - *Social Interactive game*

July 2026 - Current

- Designed a server-authoritative state machine in C++ managing game phases, roles, and player actions across networked clients
- Diagnosed a host/client state desync using debugger, traced it to missing replication callbacks, and fixed it so all clients stay in sync
- Added server-side input validation to reject invalid client actions

AI/UI Programmer, Unreal Engine 5.4.4 / C++ - *First-Person Momentum Speedrunner*

December 2025

- Built a persistent settings/state system that survived scene transitions
- Developed AI enemies with targeting, state transitions, and death triggers
- Built UI for configurable settings and rebindable controls

EDUCATION

Full Sail University, Florida - *Bachelor of Science in Game Development*

November 2023 - March 2026

- **GPA:** 3.3 / 4.0

Tools & Platforms

Visual Studio, Unity, Unreal, Git, Linux, GitHub, Jira, Perforce

CODING LANGUAGES

C#, C++, Python, JavaScript

Concepts

Object-oriented programming, state machines, AI behavior, UI systems, 3D audio, debugging

Networking

Multiplayer architecture, client-server networking, server-authoritative design, replication, matchmaking, Netcode for GameObjects, Unity Lobby and Relay, Wireshark
